Notice of Public Information Centre #2

Two New Municipal Well Installations for The Township of Centre Wellington

The Township of Centre Wellington is continuing a Schedule B Municipal Class Environmental Assessment (MCEA) study for the installation of two new municipal supply wells (Area 3 and Area 7), including connections to the existing water distribution system (i.e. watermains). The new wells will provide additional municipal water capacity to support population and employment growth in the Township. The study area is illustrated in the figure below, highlighting the two municipal well focus areas.

The goals of this Project are to:

- Ensure long-term sustainable municipal water supply
- Identify and evaluate alternative solutions
- Develop mitigation strategies to address any potential adverse impacts
- Consider feedback from consultation and engagement activities
- Recommend a preferred alternative
- Develop a municipal well implementation strategy

The Project is being completed as a Schedule B project under the framework of the Municipal Class Environmental Assessment (MCEA) process (as amended in 2024), which is approved under the Ontario Environmental Assessment Act. The Project addresses the requirements of Phases 1 and 2 of the MCEA process.

Your input is important, we want to hear from you

Consultation and engagement with the public, Indigenous Nations, regulatory agencies, and other interested parties is an integral component of the MCEA process. Feedback received throughout the study helps inform the evaluation of alternatives and the development of recommended solutions.

About Public Information Centre #2

The Township invites interested community members to attend the second Public Information Centre to learn about the Project's progress and provide input on the evaluation results and preferred solution.

- **Tuesday, November 24, 2026**
  6:00 p.m. to 8:00 p.m.
  Jefferson Elora Community Centre Hall
  29 David Street West, Elora, Ontario N0B 1S0

A **virtual PIC** will also be available on the Project webpage and will include presentation materials and a feedback form: https://www.connectcw.ca/new-water-supply-wells. The online feedback form will be available from November 24 – December 9, 2026. When the study is complete, the results will be shared in a Project File Report for public review and feedback.

If you have any questions, comments, or would like to be added to our mailing list, please contact our project team:
