Notice of Study Completion

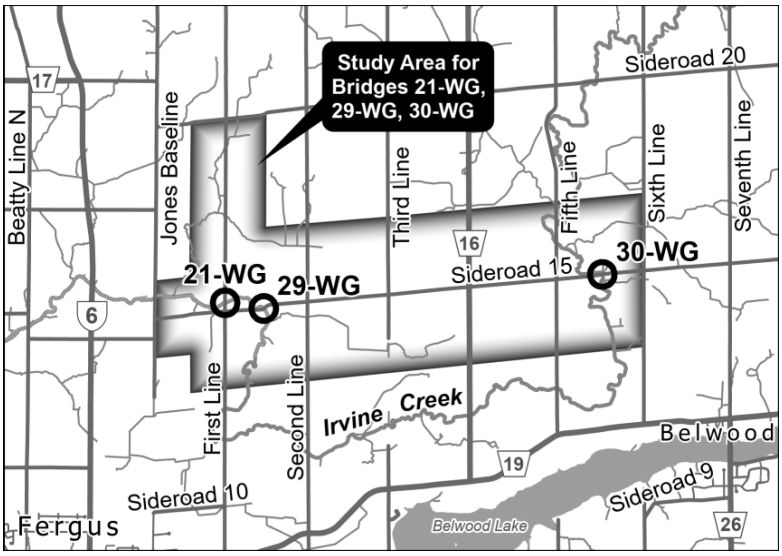

Bridge and Transportation Network Study
Bridges 21-WG, 29-WG, and 30-WG

This notice was first issued on February 19, 2026

The Study

The Township of Centre Wellington initiated a Bridge and Transportation Network Study for Bridges 21-WG, 29-WG and 30-WG in May 2025. This study evaluated the role of these structures within the overall transportation network and connectivity in the community and determined the most suitable alternative at each bridge location.

Two of the three bridges (21-WG & 30-WG) are closed due to poor condition. The third bridge (29-WG) is open but is restricted by a 5-tonne load limit. The study evaluated whether each bridge should be closed permanently, rehabilitated (with minor upgrades and modifications), or replaced.

Consultation

The Study included consultation with agencies, the public, and Indigenous Communities. A Notice of Project Screening was issued on September 25, 2025, and two Public Information Centres were held on June 10, 2025 and November 3, 2025.

Preferred Alternative

Based on evaluation and consultation, **the preferred alternative is to replace Bridges 21-WG on First Line and 29-WG on Sideroad 15, and to remove Bridge 30-WG on Sideroad 15 without replacement.** Subject to comments received following this Notice and the receipt of approvals, the Township intends to proceed with the preferred alternative, as outlined in the Project File Report.

Study Report

A Study Report has been prepared to document the planning and decision-making process. To access the Study Report and review ongoing project updates, visit the project webpage at:

https://www.connectcw.ca/CW-3Bridge-Study

If you require a hard copy of the report for review, please contact a member of the Project Team.
